# Summary Notes on Traffic Access Protocol (TAP)/Kent Resilience Forum (KRF)

Summer traffic passing through Dover was managed more effectively this year with delays reduced considerably. However, there are traffic pinch points outside the town and within the district where the police presence was not in place nor signage and rogue HGVs were able to travel through Capel and Alkham, creating the same disruption to these village communities as has happened in the past.

The incidents of TAP being activated remained consistent with last year until August when they increased by 80% on the previous year. Port of Dover notification to key members has improved and records kept.

This will be raised with the portfolio for KCC and Shaun Taylor, DDC, and Natalie Elphicke. In conjunction with Cllr Martin Bates, Shadow Portfolio Holder for Transport, Licensing and Environmental Services, I will be chasing for an update on the proposed pilot they were going to run wherein the start of TAP would be moved back to the layby along the A20.

The events of this Summers traffic have highlighted that the external Dover traffic problem remains and that there is much more work to be done on this constantly recurring challenge.

In continuation of this goal both Cllr Martin Bates and I from our current shadow role status/perspective will be pursuing the following core objective headings to seek a permanent and sustainable solution to Keep Dover Moving but also manage the district traffic pinch points more effectively. Much groundwork has already been done and both of us look forward to seeing it completed under the new administration.

- 1. Be initiative-taking and proactive before a declaration of a critical incident.
- 2. Seek better co-ordination.
- 3. Bi-lateral Partnership.
- 4. Improved Port Infrastructure.
- Better HGV Facilities. 5.
- Review TAP. 6.
- Local Road Control Improvements. 7.
- Work to Improve Local Road Infrastructure.
